

WARMTH Members Assembly 2017-10-20

Starting Time: 16.45; Ending Time: 17:55, Attendants: list attached

MINUTES

1. OPENING

Assembly is opened by IV after the Agenda for the Assembly had been discussed by the EB members available.

2. WARMTH FUTURE STRATEGY

- a. HT summarizes the discussion points raised in Session 1 with possible future implications for WARMTH. Basically, WARMTH has to strengthen its therapy prospective with more intensive collaboration with oncologists and colleagues from other neighbouring fields. HT will present the NICHTCAP Study soon.

Prof Andrew Scott, President WFNMB is very keen to collaborate with WARMTH on this project and has offered to arrange statistical analysis of the pooled data, and more importantly, he will coordinate grant funding application once the study gets off the ground. WARMTH would provide training and mentorship for new sites. Thus WARMTH will build a WARMTH network of reference sites of expertise across the world to harmonise the clinical practice of theragnostic nuclear oncology. In particular, WARMTH can then offer Pharma, at commercial rates, a validated test-bed for their RCT theragnostic trials. Once all the nuclear physicians are on board WARMTH will invite all their oncologist and urologist colleagues to join WARMTH and help to refine the study design when we convene the first Investigators Meeting during the WARMTH ICRT and WFNMB congress in Melbourne. Subsequent investigator meetings would be held at the WARMTH meetings in Helsinki, Jeju and then in China.

- b. In general, more intensive future collaboration of WARMTH with IAEA is appreciated by IAEA representatives (DP, TP). Assistance of DP's division at IAEA in future prospective trials such as the one with ^{177}Lu or ^{225}Ac PSMA ligand is shortly mentioned. Points are to be discussed in more detail in a separate meeting soon. The common emphasis of both WARMTH and IAEA on education is raised by TP and underlined by RB and IV. The WTA issues are shortly discussed then. The educational issues of WARMTH have to be endorsed and renewed. Global education certainly is one of our common talks resulting in global guidelines and distribution via IAEA as well.

3. **WARMTH (India) Membership Issues.** JM reports on 477 members and 87 who have not yet renewed their membership yet.

4. **Financial Issues of WARMTH (India) and WARMTH International.** PC reports that the financial issues in India are to be solved soon. The financial story – ongoing since the demise of AP - brought us to open a new non-profit place in the US which we have to re-name WARMTH_{International}. All members of WARMTH will become members of WARMTH_{International} if not otherwise stated. **PC state that after all taxis about 25.000 USD are left over in India.**

5. **Future Congresses**

- a. ST presents the **WFNMB Congress in Melbourne, April 20th-24th, 2018** and a 1-Day programme for the 1st ISRT 2018 of WARMTH on Friday April 20th. The post-congress meeting is on prostate and RB is already a leading WARMTH representative. WARMTH members will not have to pay for the WARMTH meeting on Friday 20, but would have to pay for attending the WFNMBI congress. All travel and accommodation costs will have to be paid by the individual!
- b. KK presents the 2nd ISRT 2018 under our WARMTH banner to be held in Helsinki November, 18th-20th 2018 WARMTH members will not have to pay for the 2-day programme (which he already presented), but will have to pay for travel and accommodation costs.
- c. FW presents the ICRT 2019 in Nanjing, China. This will be our next larger event after in August 2019, after Innsbruck 2015.

6. **WARMTH next Elections**

IV as president-elect of WARMTH will take over WARMTH International as President in 2018. We will invite all members for election of the next president-elect of WARMTH International early next year.

Irene Virgolini

Congress President

ICRT2017

Josh Mailman

Chief Operational Officer
